their delivery.

Stage 2 **BA Team**

BA team(s) share an understanding of business objectives. Individual projects may be measured for return. No organizationwide validation of return.

A framework is defined for aligning IT initiatives with organizational strategy. BA teams are able to utilize business objectives to make daily scope decisions.

The BA COE team is distributed throughout the enterprise, working to keep requirements and frameworks aligned with enterprise-level business objectives and business strategy.

The BA COE team measures the impacts on business outcomes, and continues incremental improvement and iteration.
